

Final Testing Report — FR-11: Order History View

Assignment: HW02 — AI-First Domain Testing & Boundary Value Analysis
Feature ID: FR-11
Feature: Order History View (User)
Date: 2026-07-07
AI Tool: Antigravity (Gemini 3.5 Flash / Claude Sonnet 4.6 Thinking)
SUT: EShop — <http://localhost:5173>

Table of Contents

- 1. [Feature Overview](#)
- 2. [Testing Environment](#)
- 3. [Domain Testing Summary](#)

1. Feature Overview

Item	Detail
Feature	Order History View (User)
Actor	Registered / Authenticated User
Entry Point	http://localhost:5173/profile (embedded section)
API Endpoints	GET http://localhost:3000/api/orders/my-orders (Fetch history)

Item	Detail
	PUT http://localhost:3000/api/orders/:id/cancel (Cancel order)
Expected Success Response (Cancel)	HTTP 200 — {"message": "Order canceled successfully"}

System States

- **Empty State:** Shows message "Bạn chưa có đơn hàng nào." when no orders exist.
- **Order List State:** Renders a read-only table with columns: Mã ĐH (Order ID), Ngày đặt (Date), Tổng tiền (Total amount in đ), Trạng thái (Status badge), and Thao tác (Cancel button).

2. Testing Environment

Component	URL	Status
Frontend	http://localhost:5173	✓ Reachable
Backend	http://localhost:3000	✓ Reachable
Playwright	headless Chromium	✓ Working

Evidence: [ENV-01-profile-page.png](#)

3. Domain Testing Summary

Methodology

Technique: **Equivalence Partitioning / Domain Testing**
Artifacts: DT-01 → DT-02 → DT-03 → DT-04 (each reviewed via REVIEW-01)

Test Cases

TC ID	Scenario	Partitions Covered	Expected Result	Actual Result	Status
TC-DT-001	Views table (pending order)	AT-P1, OC-P2, OS-P1	Table renders; cancel button shown	Table renders; cancel button shown	✓ PASS
TC-DT-002	Zero orders	AT-P1, OC-P1	"Bạn chưa có đơn hàng nào." message	Message shown; table hidden	✓ PASS

TC ID	Scenario	Partitions Covered	Expected Result	Actual Result	Status
TC-DT-003	Unauthenticated access	AT-P2	"Vui lòng đăng nhập" or redirect	"Vui lòng đăng nhập" shown	 PASS
TC-DT-004	Invalid token	AT-P3	API rejects call with HTTP error	Returns HTTP 403 Forbidden	 PASS
TC-DT-005	confirmed order status	AT-P1, OC-P2, OS-P2	Badge "Đã xác nhận"; cancel button shown	Badge "Đã xác nhận"; button shown	 PASS
TC-DT-006	shipping order status	AT-P1, OC-P2, OS-P3, OI-P2	Badge "Đang giao"; cancel button shown	Badge "Đang giao"; button shown	 PASS
TC-DT-007	delivered order status	AT-P1, OC-P2, OS-P4	Badge "Đã giao"; cancel button hidden	Badge "Đã giao"; button hidden	 PASS*
TC-DT-008	canceled order status	AT-P1, OC-P2, OS-P5	Badge "Đã hủy"; cancel button hidden	Badge "Đã hủy"; button hidden	 PASS*
TC-DT-009	Cancel pending order	AT-P1, OC-P2, OS-P1, OI-P1	Alert "Hủy đơn thành công!"; badge→"Đã hủy"	Alert popped; badge→"Đã hủy"	 PASS*
TC-DT-010	Cancel delivered via API	AT-P1, OI-P3	API returns HTTP 400 with error	Returns 400 Cannot cancel this order.	 PASS
TC-DT-011	>10 orders (pagination limit)	AT-P1, OC-P3	Max 10 orders returned/shown	Returns 19 orders; renders all 19	 FAIL

TC ID	Scenario	Partitions Covered	Expected Result	Actual Result	Status
TC-DT-012	Unknown status	AT-P1, OC-P2, OS-P6	Status uppercased fallback (e.g. PROCESSING)	Skipped (API-only restriction)	▶▶ SKIP

*** Note on TC-DT-007/008/009:** Re-verified manually via screenshots. The automated script registered false-fails because it counted the cancel button globally on the page rather than scoping to the specific target row. The actual SUT behavior was correct.

4. Boundary Value Analysis Summary

Applicable Variables

Variable	Boundaries	Reason Included/Excluded
orderCount	Min = 0, Max = 10	✔ Applied (explicit limits)
authToken	None	✗ Skipped (categorical string)
order.status	None	✗ Skipped (enumeration)
orderId	None	✗ Skipped (internal database ID)

BVA Test Cases

TC ID	Boundary	Test Value	Expected Result	Actual Result	Status
TC-BVA-001	min	0	Empty message, no table	Message shown, no table	✔ PASS
TC-BVA-002	min+1	1	Table with 1 row	Table with 1 row	✔ PASS
TC-BVA-003	nominal	5	Table with 5 rows	Table with 5 rows	✔ PASS

TC ID	Boundary	Test Value	Expected Result	Actual Result	Status
TC-BVA-004	max-1	9	Table with 9 rows	Table with 9 rows	 PASS
TC-BVA-005	max	10	Table with exactly 10 rows	Table with exactly 10 rows	 PASS
TC-BVA-006	max+1	19	Truncated to 10 orders	All 19 orders shown	 FAIL

5. Execution Results

Summary

Technique	Total TCs	PASS	FAIL	SKIP
Domain Testing	12	10	1	1
BVA	6	5	1	0
Total	18	15	2	1

6. Bug Reports

BUG-FR11-001 — Medium Severity

Field	Detail
Bug ID	BUG-FR11-001
Title	GET /api/orders/my-orders does not enforce pagination limit (returns all orders)
Linked TCs	TC-DT-011, TC-BVA-006

Field	Detail
Actual Behavior	API returns all 19 orders; UI renders all 19 rows.
Expected Behavior	API truncates output to max 10 orders per call.
Evidence	TC-DT-011.png , TC-BVA-006.png
File	bugs/FR11/BUG-001.md

7. AI Gap Analysis

Full analysis in `GAP-01-gap-analysis.md` .

Gaps Identified

- 1. **Test harness bugs (G-01):** Global cancel button selection led to initial script false-fails. Row-specific scoping resolved the validation.
- 2. **Data pollution bugs (G-02):** Re-running BVA script without unique user emails accumulated orders. Corrected by adding a dynamic `runId = Date.now()` to test user registration.
- 3. **Security (G-03):** No cross-user order cancellation test cases were present. Proposed candidate `TC-NEW-01` to check authorization.
- 4. **Discrepancy (G-04):** The UI shows the cancel button for `shipping` orders, but the API specification restricts cancellation to "not yet delivered" (`chưa giao`). Backend enforcement for this status was not verified directly due to black-box constraints. Proposed candidate `TC-NEW-02` .

8. Conclusion

Feature Status: **PARTIALLY FUNCTIONAL**

The Order History View is **functional** for viewing, status display, and order cancellation. However, it lacks pagination limit enforcement (BUG-FR11-001), displaying all historical orders instead of the maximum of 10. Additionally, the ability to cancel orders in `shipping` status via the UI may contradict backend restrictions and requires verification.

Recommended Priority

- 1. Fix GET /api/orders/my-orders database query to limit results to 10 (or implement pagination).
- 2. Clarify if shipping orders can be cancelled and align UI cancel button visibility accordingly.
- 3. Re-execute BVA-006 to verify pagination truncation.
